

Nahuel Gomez

FULL STACK DEVELOPER

ABOUT ME

I'm inspired to design appealing websites with a focus on user interface and experience. I'm also skilled in various programming languages, frameworks, and technologies such as React, NodeJS, NextJS, PHP, and MongoDB. I enjoy pair-programming and remote work.

SKILLS

- Functional testing

- Pair programming

- Relational databases

EDUCATION

National University of Quilmes

February 2022 - Ongoing

Second year undergraduate student of the bachelor's degree in computer science

EXPERIENCES

Intern Web Developer at Modatex

June 2022 - October 2022

As an intern web developer at a clothing store, I worked with React, NodeJS, and SQL Server to develop and maintain the company's website. My activities included:

- Collaborating with the design team to implement website layouts
- Configure usability of all front side applications
- Testing and debugging website code
- Updating website content and product information
- Implementing e-commerce features such as shopping carts and payment gateways
- Analyzing website analytics to identify areas for improvement.
